

**MIDAS # 1808
FISCHER LAKE**

FT. FAIRFIELD TWP, AROOSTOOK CO, MAINE

AREA 10 ACRES

FISCHER LAKE

Fort Fairfield, Aroostook County
U.S.G.S. Easton Center, Me - N.B. (7 1/2')

Fishes

Brook trout
Minnnows
Golden shiner
Redbelly dace

Creek chub
White sucker
Threespine stickleback

Physical Characteristics

Area - 11 acres

Maximum depth - 6 feet

Principal fishery: Baitfish

Temperatures:

Surface - 64⁰F

5 feet - 62⁰F

Fischer Lake is completely ringed by cattails and alders with several reverting potato fields visible from the pond. Fischer Lake provides marginal brook trout habitat and supports a limited brook trout population.

Fischer Lake was chemically reclaimed in 1958 along with Monson Pond to reduce populations of competing species, and to reestablish a brook trout fishery. Although successful in greatly reducing competition for food and space for a few years, the above species have since become established.

Surveyed - August 1958
(Revised - 1998)
